**Frameworks:** Scikit-learn, Keras, Pandas, Matplotlib  
**Design:** Figma, Canva, Procreate  
**Tools:** Git, Notion, PowerPoint, FlipaClip

## Projects

**ParaliXpert**  
This project aims to solve the problem of stubble burning by turning Parali from waste to a valuable resource. The solution involves developing a website to connect farmers and industries. This initiative promotes sustainability while benefiting both stakeholders.  
[View Project](#)

**GreenSteps**  
A carbon footprint-reducing application designed to help individuals and businesses monitor, reduce, and offset their carbon emissions.
